Notes: *Ranger said levels of oil and propane are good. Vender comes when called as needed. We will check levels on our next visit.

 *Ranger said Culligan is set up to come every two weeks. When asked if they had keys, he said he does not know.

Report Date: 03/27/2017

Camp Elliott Girl Scouts
345 Camp Elliott lane
Volant, PA 16156

Project: PWSID# 6370849
Lab Sample #: 17315-001
Sample ID: Woods Edge
Sample Name: Loc ID 701
Sample Date: 3/23/2017 8:14:00 AM
Date Received: 3/23/2017

Parameter	Result	Reporting Qual. Limit	Method	Analysis Date	Analyst
Total Coliform, Presence/Absence	Absent		SM 9223B Colilert	03/23/17 12:45	TMM
E. coli, Presence/Absence	Absent		SM 9223B Colilert	03/23/17 12:45	TMM

This sample does pass the PA DEP's Safe Water Drinking Act for Total Coliform & E.Coli bacteria and therefore is noted as "Safe to Drink" on the basis of the coliform bacteria test.

If there are any questions regarding this data, please call.

- CCV The Continuing Calibration Verification (CCV) recovery for this compound did not meet method acceptance criteria. The average of all compounds did meet method acceptance criteria as specified in EPA Method 8000 B.
- D1 Sample required dilution due to matrix interference.
- D2 Sample required dilution due to high concentration of compound.
- D3 Sample required dilution due to lack of proper sample weight or volume.
- HT Sample was analyzed past holding time.
- HT3 Sample was received and analyzed past holding time.
- MB Compound detected in method blank at or above the method reporting limit.
- MD Sample was analyzed undigested.
- MS1 The laboratory fortified matrix (LFM) result for this sample is above established acceptance criteria. But since the sample result is below the regulatory level, the result is valid for regulatory use.
- MS2 The lab fortified matrix (LFM) result for this sample is not within established acceptance criteria. The sample result is above the regulatory limit and is considered to be "estimated" because matrix interferences may be preventing accurate determination.
- MS3 The laboratory fortified matrix (LFM) result for this sample is not within established acceptance criteria due to high concentration of sample.
- MS4 The laboratory fortified matrix (LFM) result for this sample is not within established acceptance criteria. The laboratory fortified blank (LFB) was within the accepted criteria, therefore matrix interference is assumed.
- P1 Sample was not preserved properly.
- RPD Relative Percent Difference (RPD) exceeded the method acceptance limits. The sample result is to be considered "estimated".
- S Analysis not on laboratory's scope of accreditation.
